

C/C++ Programmer (part-time)

The HDF Group, formerly HDF group at NCSA, is a non-profit corporation at the Research Park. We have an immediate opening for a part-time C/C++ programmer. Continued employment into the 2011 spring and subsequent academic years is possible.

HDF is a file format and a set of library routines and utilities for storing, accessing and visualizing scientific information. Visit <http://hdfgroup.org> for more information.

The person working for this position will be involved in several projects related to HDF applications from NASA. The following skills are needed:

- Strong C/C++ programming experience under Unix/Linux
- Programming experience with autoconf, automake and shell scripts
- Programming experience with building, installing, testing a software package depending on other packages
- Programming experience with Python and Java is a plus
- Knowledge of Earth Sciences is a plus
- Experience using HDF, HDF-EOS and other Earth Science data is a plus
- Experience using other Earth Science software is a plus

To apply, please email your resume and a brief cover letter to jobs@hdfgroup.org.

The HDF Group is an equal opportunity employer.
