

HDF Cloud Software Engineer

Why the HDF Group?

At The HDF Group, we do things that matter and are a force for the common good. Our mission is to make large complex data manageable and efficiently accessible, anywhere and indefinitely. We are doing that because we want to help communities of researchers advance science and engineering and enable companies and organizations to make better data-driven decisions faster. We sustain ourselves by maintaining high-quality open-source software complemented by support, training, development, and consulting services to raise funds to invest in ideas, conduct research, and spark innovation. Working with us is a vocation, not a career.

The Role

As HDF Cloud Software Engineer, you develop solutions for public and private cloud deployments of HDF5 software. You report directly to the Director of Software Engineering. The HDF Group is based in Champaign, IL, which is the default job location, but remote work arrangements are available within the United States for suitable candidates. Compensation is commensurate with experience and qualifications.

Essential Job Functions and Key Responsibilities

- Design/implement new features (incl. supporting tests)
- Write technical documentation
- Experiment with new technologies relevant to the development area; recommend improvements to techniques, procedures, or other aspects of technical development
- Provide input for preventing future problems and incorporating solutions to current concerns
- Publish work and attend technical conferences as requested

Minimum requirements

- Bachelor's Degree in a scientific, mathematical, or engineering field
- Experience with Python and common tools within the scientific and data science Python ecosystem
- Minimum 2 years of technical lead or software development experience with 4 or more years preferred
- Ability to communicate clearly to all types of audiences – from the inexperienced to highly technical users
- Strong oral and written communication skills

Knowledge, Skills, and Abilities preferred

- M.S. or Ph.D. degree in a scientific, mathematical, or engineering science
- 4+ years work experience
- Python development experience
- Experience in working with AWS, Google, or Azure clouds, and frameworks such as Terraform
- Knowledge of REST APIs

To ensure full consideration, please submit a resume, cover letter, and references to jobs@hdfgroup.org. For additional information, refer to our website at <http://www.hdfgroup.org>.

The HDF Group is an Equal Opportunity Employer that recruits and hires qualified candidates regardless of race, color, religion, sex, sexual orientation, gender identity, age, national origin, disability, or veteran status.

In compliance with federal law, all persons hired will be required to verify identity and eligibility to work in the United States and to complete the required employment eligibility verification document form upon hire. The HDF Group uses [E-Verify](#) to verify employment eligibility as a qualifying federal contractor.

To comply with federal contracting guidance, The HDF Group employees must be fully vaccinated against COVID-19. If you cannot receive the vaccine for medical or religious reasons, you may seek approval for an exemption following applicable company processes.
